

GEOSOPHY

Featuring: Paul Devereux, John Michell, Nigel Pennick, John Steele, Martin Brennan, Harry Oldfield
Directed by Vakasha Brenman

Why did the ancients build sacred sites around our planet circles, pyramids, henges, standing stones? Why did they make massive use of crystals? Constructs leys? Develop geomancy and use sacred geometry all over the world? These subjects are defined in this documentary film.

The world-renowned researchers and philosophers carrying on the pioneer work in Earth Mysteries in Britain are developing a new science – “Geosophy” – meaning “Earth Wisdom” from Gaia, the Greek goddess for earth, and Sophia, wisdom. They are rediscovering knowledge from the remote past, which can bring new understanding to modern problems, new knowledge of our planet earth and our relation to it.

AVAILABLE ON VHS AND DVD/95 MINUTES (please contact us for prices and orders)
