

The Goldman Environmental Foundation has awarded the 2010 Goldman Environmental Prize to a group of six emerging leaders for their efforts in addressing some of the most pressing environmental problems affecting local communities and the planet.

This Year's Winners

Thuli Brilliance Makama, Swaziland

Thuli Makama, Swaziland's only public interest environmental attorney, won a landmark case to include environmental NGO representation in conservation decisions and continues to challenge the forced evictions and violence perpetrated against poverty-stricken communities living on the edges of conservation areas.

Tuy Sereivathana, Cambodia

Tuy Sereivathana worked to mitigate human elephant conflict in Cambodia by introducing innovative low-cost solutions, empowering local communities to cooperatively participate in endangered Asian elephant conservation.

Malgorzata Górska, Poland

Malgorzata Górska led the fight to protect Poland's Rospuda Valley, one of Europe's last true wilderness areas, from a controversial highway project that would have destroyed the region's sensitive ecosystems.

Humberto Ríos Labrada, Cuba

A scientist and biodiversity researcher, Humberto Ríos Labrada promoted sustainable

agriculture by working with farmers to increase crop diversity and develop low-input agricultural systems that greatly reduce the need for pesticide and fertilizer, encouraging Cuba's shift from agricultural chemical dependence.

Lynn Henning, USA

Family farmer in rural Michigan, Lynn Henning exposed the egregious polluting practices of CAFOs –concentrated animal feeding operations- gaining the attention of the federal EPA and prompting state regulators to issue hundreds of citations for water quality violations.

Randall Arauz, Costa Rica

Drawing international attention to the inhumane and environmentally catastrophic shark finning industry, Randall Arauz led the campaign to halt the practice in Costa Rica, making his country the new international model for shark protection.

About the Goldman Environmental Prize

The [Goldman Environmental Prize](#) was established in 1989 by San Francisco civic leader and philanthropist Richard N. Goldman and his late wife, Rhoda H. Goldman. It has been awarded to 139 people from 79 countries. Prize winners are selected by an international jury from confidential nominations submitted by a worldwide network of environmental organizations and individuals.

Previous Prize winners have been at the center of some of the world's most pressing environmental challenges, including seeking justice for victims of environmental disasters at Love Canal and Bhopal, India; leading the fight for dolphin-safe tuna and fighting oil drilling in the Arctic National Wildlife Refuge.

Since receiving a Goldman Prize, eight winners have been appointed or elected to national office in their countries, including several who became ministers of the environment. The 1991 Goldman Prize winner for Africa, Wangari Maathai, won the 2004 Nobel Peace Prize.
