

General information

Be part of [EREC 2011](#) , the fourth edition of **Europe's leading Renewable Energy Policy Conference** . The biennial conference organised by **EREC** (European Renewable Energy Council) has grown ever since its first edition in 2004 and has become Europe's major occasion for exchange and interaction between industry, research and policy

European and national policy makers, industry leaders and research experts will meet at the heart of European decision making to discuss market trends, legislative developments as well as future energy strategies.

EREC 2011 will:

-

Outline energy pathways to 2050

-

Debate the implementation of the RES Directive

-

Discuss Europe's infrastructure needs

-

Emphasise the key role of local actions

-

Provide a global perspective on emerging markets

-

Feature the perspective of investors and developers

EREC 2011 offers the vibrant networking opportunities you are looking for!

More than 600 stakeholders are expected to attend from a range of backgrounds:

-

EU institutions and permanent representations to the EU

-

National governments and local administrations

-

Energy agencies

-

Energy regulators and companies

-

Utilities and DSOs/TSOs

-

Research and academic institutes

-

NGOs and consumer groups

-

Consultancies

-

Financial institutions and the insurance sector

EREC 2011 provides an unparalleled opportunity to showcase and demonstrate your role in and commitment to the European renewable energy arena and to directly engage with senior political decision makers from all over Europe [Read More...](#)
