

Environment and Behavior

Environment and Behavior (EAB) examines relationships between human behavior and the natural and built environment. Diverse research topics include environmental experiences (e.g., restorativeness, place attachment/identity, environmental perception/cognition); environmental outcomes (e.g., pro-environmental behaviors such as recycling; health-supportive environments; design preferences); and processes linking environments and behaviors that support or thwart human well-being.

Impact Factor: 1.365

Ranked: 24/66 in Environmental Studies and 45/111 in Psychology, Multidisciplinary
